Report Detail

The Repatriation Medical Authority has defined paraquat as "a dipyridilium compound whose dichloride and dimethylsulphate salts are used as contact herbicides" and requires cutaneous (skin) contact with paraquat or bipyridine in the process of paraquat manufacture.

Is there a history **at any time**, both service and non-service periods, of cutaneous contact with paraquat, as described above, on more days than not for a cumulative period of **at least 1000 days**?

- No** - Please sign the form and return it to the Department
- Yes** - Please provide details on the next page, being as specific as possible:

Details of cutaneous (skin) contact with paraquat:

Period of cutaneous contact with paraquat	Description of cutaneous contact with paraquat including activity being performed, how contact occurred and the place where contact occurred	Number of days per week of cutaneous contact with paraquat during this period
