Report Detail

A claim for service related compensation in respect of the abovenamed leads the Department to consider whether a trauma to the thoracic spine could be a factor in the development of thoracic spondylosis in this case. Would you please answer the following questions:

1. When was the clinical onset of thoracic spondylosis?...../...../.....
2. Has the veteran ever had a trauma to the thoracic spine?
 - No** - Please sign the form and return it to the Department
 - Yes** - When did the trauma occur?

/ /

3. How did the trauma to the thoracic spine occur? Did the trauma occur as a consequence of a medical or surgical condition? (eg a fall occurring as a result of a transient ischaemic attack.) If so, what was the condition?

4. Did the trauma to the thoracic spine result in symptoms, within 24 hours, of pain, tenderness and altered mobility or range of movement of the thoracic spine?
 - No** - Please sign the form and return it to the Department
 - Yes**
