Report Detail

A claim for service related compensation in respect of the above named leads the Department to consider whether acquired abnormal tracking of the patella could be relevant to the development of (insert claimed position) in this case. Would you please answer the following questions:

1. When was the clinical onset of chondromalacia patella?
 - Left**/...../.....
 - Right**/...../.....
2. Has the veteran ever suffered from an acquired abnormal tracking of the patella of either knee?
This has been defined by the Repatriation Medical Authority as aberrant movement or position of the patella relative to the femoral condyles in the course of knee flexion or extension
 - No** - Please sign the form and return it to the Department
 - Yes** - Please provide details of the acquired abnormal tracking on the next page:

Acquired abnormal tracking of the patella:

Date of onset of abnormal tracking	Knee (L or R)	Cause	Was the acquired abnormal tracking cured/relieved by treatment? Please give details including date(s) of treatment.
