Report Detail

A claim for service related compensation in respect of the above named leads the Department to consider whether a specified endocrinological disorder could be relevant to the development of erectile dysfunction in this case. Would you please answer the following questions:

1. Has the veteran ever suffered a specified endocrinological disorder, as defined by the Repatriation Medical Authority?

The RMA states that 'a specified endocrinological disorder' means a disorder of the endocrine system which can result in sexual dysfunction, and includes Cushing's syndrome, acromegaly, hypogonadism, testicular hypofunction, hypogonadotropic hypogonadism, hyperthyroidism, hypothyroidism, hyperprolactinaemia, pituitary gland adenoma, pituitary or hypothalamic dysfunction, or panhypopituitarism.

- No** - Please sign the form and return it to the Department
- Yes** - Please identify the condition(s), indicate the date of onset of the condition, and where appropriate, indicate any dates of remission or cure for the conditions:

Diagnosis	Date of onset	Date of remission or cure (if appropriate)
	/ /	/ /
