Report Detail

A claim for service related compensation in respect of the above named leads the Department to consider whether treatment with a smooth muscle relaxant drug could be relevant to the development of gastro-oesophageal reflux disease in this case. Would you please answer the following questions:

1. When was the clinical onset of gastro-oesophageal reflux disease?...../...../.....
2. Has the veteran ever been treated with a smooth muscle relaxant drug? (*The Repatriation Medical Authority has defined a smooth muscle relaxant drug as "an anti-cholinergic drug, a beta-adrenergic drug, a nitrate drug, or a calcium channel blocker drug, theophylline, or aminophylline".*)
 - No** - Please sign the form and return it to the Department
 - Yes**
3. Was this treatment with a smooth muscle relaxant drug ever stopped or replaced by some other therapy?
 - Yes** - Please sign the form and return it to the Department
 - No** - Please provide details of the drug treatment.

<i>Medication Used</i>	<i>Condition treated</i>	<i>Date Treatment Commenced</i>	<i>Could this drug be ceased or substituted?</i>
		/ /	<input type="checkbox"/> Yes <input type="checkbox"/> No
		/ /	<input type="checkbox"/> Yes <input type="checkbox"/> No

4. Did the gastro-oesophageal reflux disease permanently worsen? **Note:** For the purposes of the *Veterans' Entitlements Act* (1986), permanent worsening requires an increase in the gravity of
